1. Register for an account at [www.myopenmath.com](http://www.myopenmath.com).

2. After creating account, login and click on “Add New Course”. Then select “Copy from Colleague’s Course”.

Once you enter the course ID and click on Look up course you will see HB 5 course. Enter the Enrollment key Math.

3. Enter new course name, course start and end dates, etc.

Enrollment key protects your course by only allowing those with the key to enroll into your course. When students register for your course they will be asked for the course ID and enrollment key if you created one.

Don’t forget to make the course available to students by checking the box.

Your course has been created!

For students to enroll in this course via direct login, you will need to provide them two things:

1. The course ID: 79825
2. Tell them to leave the enrollment key blank, since you didn’t specify one. The enrollment key acts like a con

If you plan to integrate this course with your school's Learning Management System (LMS), it looks like your school LTI key and secret established - check with your LMS admin. If so, you will not need to set up a course-level con
course-level configuration for some reason, the key and secret can be found in your course settings.
